NEW YORK

Nothing Without Us: Disability Inclusion and the Pandemic Recovery

Hosted by the Governments of Canada, Philippines and Hungary

At the 14th Session of the Conference of States Parties to the United Nations Convention on the Rights of Persons with Disabilities

**Thursday June 17, 2021
11:30 a.m. - 12:45 p.m. EDT time**

Background

The pandemic has disproportionately impacted the most vulnerable and marginalized groups who lack access to essential health, education, and economic resources. The United Nations Policy Brief titled, “A Disability-Inclusive Response to COVID-19”, called for an integrated approach to ensure that persons with disabilities are not left behind in the COVID-19 response and recovery. It calls for placing persons with disabilities at the centre of the response, participating as agents of planning and implementation. Further, the inclusion of persons with disabilities in the COVID-19 response and recovery is a vital part of achieving the pledge to leave no one behind, and a commitment to the Convention of the Rights of Persons with Disabilities (CRPD), the 2030 Agenda for Sustainable Development, and the Agenda for Humanity. It is also central to the UN’s commitment to achieve transformative and lasting change on disability inclusion, reflected in the United Nations Disability Inclusion Strategy launched by the Secretary-General in June 2019.

The disability community in Canada and internationally has continually called upon all levels of government to include persons with disabilities in its management of the current pandemic and recovery efforts. This side event would focus on how countries can take an overarching “Nothing without us” approach to the pandemic recovery and ensure full social and economic inclusion of persons with disabilities.

Disability Inclusion

This panel will share how persons with disabilities are being included in the pandemic recovery plans, identify challenges being faced and highlight elements that are essential to success. We will also hear about a broad range of initiatives, supports, mechanisms and initiatives that have been put in place throughout the pandemic or are being developed to support persons with disabilities.
